

STARKE **ARVID**

presents the Board Trolley
- Simple yet ingenious

Uncompromising board transportation

Thanks to its simple yet ingenious construction, our Board Trolley is perfect for transporting smaller quantities of plaster board or other sheet materials which would otherwise be carried into the site by hand. This uncompromising trolley allows up to 12 No. 12, 5 mm boards to be moved ergonomically at the same time, even through narrow passageways.

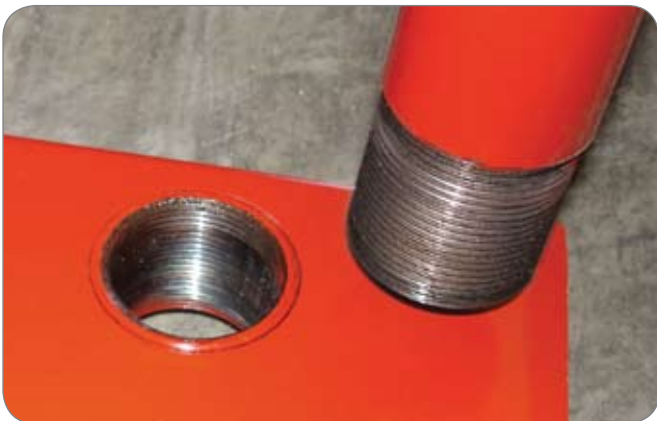

The two swivel castors – one of which is lockable – mean that two people can manoeuvre the trolley with ease. The board materials are supported during transportation due to the angle of the loading surface. The vertical support, which also acts as a handle, can easily be removed so that the trolley takes up less space when in transit between projects.

The load does not obstruct the view or create a large overhang

Two swivel castors, one of which is lockable, at the rear

The support is removable for storage and transportation between projects

Angled edge on the short side reduces wear on the boards

Technical data

Starke Arvid Board Trolley

Article no.:	11700
Maximum load:	350 kg
Width:	640 mm
Length:	1130 mm
Height:	1180 mm
Weight:	47 kg

This is just one of many Starke Arvid products which aim to improve plasterboard logistic and handling solutions within the construction industry.
